SOLCOAT®

Your industrial partner
to achieve excellence

web

With its 3 factories located all over the Iberian Peninsula, Coated Solutions is able to offer more than 300.000 tons of prepainted steel coils on the Spanish and international markets.

All 3 factories - Aranda de Duero, Santander and Aveiro - have a strategic location. Our extensive experience in multimodal logistics gives us the possibility to deliver in a reliable and timely way to our customers, whatever their geographical location.

With the trust and support of our customers, Solcoat® has gradually become a recognized product in the industry, synonymous with good quality and outstanding Service, while bringing added value to our customers.

Our goal is to be as efficient as possible in terms of production while doing this in the most sustainable way. Solcoat® is the brand of our prepainted products range and is a guarantee of the quality we can provide.

We constantly look for the best suppliers in terms of paint and steel, in order to deliver the utmost quality to our demanding customers.

SOLCOAT®

It covers a wide range of applications for prepainted steel and enables us to answer to the requirements and expectations of the most demanding customers.

Wide product range

MAIN COATING FINISH AND PROPERTIES

PROPERTIES	RECOMMENDED FOR
SOLCOAT® PE25	Recommended for external usage in facades and metallic surfaces.
SOLCOAT® PU25	Industrial applications for internal and internal usages, requiring good bending properties.
SOLCOAT® PE35	Recommended for external usage, for facades, metallic surfaces and accessories.
SOLCOAT® PE25 Rough	Recommended for roofing panels, especially when the goal is to achieve roof tile effect, considering the specific texture of the coating.
SOLCOAT® PE35 Rough	Recommended for roofing panels, especially when the goal is to achieve roof tile effect, considering the specific texture of the coating.
SOLCOAT® PVDF 25	Product adapted to external usage, especially when the steel is submitted to intense and prolonged UV light.
SOLCOAT® PVDF 35	Product adapted to external usage, especially when the steel is submitted to intense and prolonged UV light.
SOLCOAT® PUPA 55	Product adapted to applications that require high resistance to abrasion and more color and gloss durability.
